MD SERIES

Nortruck Announces the New MD SERIES Canopy
High-quality, cost effective canopies for Ford, GMC, Dodge, Toyota & Nissan trucks.

A break-through in value and engineering, Nortruck's new **MD SERIES** canopy offers the strength and craftsmanship we are renowned for. Built specifically for light/medium duty trucks, commercial customers can now have 100% welded aluminum canopies to keep their tools safe. No longer do electricians, plumbers, HVAC and telecomm specialists need to compromise with mass produced, flimsy products that just don't last.

"Being able to buy the strong, well-made product for our F-150's, has increased our peace of mind knowing our tools and expensive test equipment are secure and safe. The bottom line is this investment will help our business grow."
 David P. (Journeyman Electrician)

"...we looked at three different options and our ROI potential. Our Management Team decided on the design that most robust and end user friendly. When we put all three candidates to the quality test, the Nortruck unit was the clear choice for our fleet of light trucks...."
 Mark H. (Business Development Manager)

"we've moved to a 100% welded canopy due to the loss of over \$80,000 in tools and electronic equipment from our original light gauge canopy..... We also appreciate that we are working directly with a manufacturer"

Brian P (Operations Manager)

Find out how the new MD SERIES will make a difference to your service fleet.
